

A powerful media distribution center is the heart of the connected home. Managed WiFi with GigaCenter is an integrated commercial grade AC router; powerful enough to access the Internet from any device, anywhere in your home. It streams video, music, gaming and Internet applications over WiFi at speeds up to 5x faster than today's best-effort alternatives.

## How will Managed WiFi with GigaCenter help you?

- We will help you with password changes, parental controls, troubleshooting and connectivity issues right from our office.
- Always have the most up-to-date firmware & software.
- Avoid the hassles of maintaining your own router and configuring a network.
- Routing changes can be done from Polar.
- High-end carrier grade equipment with the latest technology including multiple-input and multiple-output, or MIMO.
- Serves all devices at once - less waiting.
- More channels - unrestricted speed.
- Great coverage - eliminate WiFi dead zones.
- Includes free NetValet app allowing you to control users and devices, set access policies, monitor traffic, and set up home and guest networks.

Sign up for Managed WiFi  
with GigaCenter before  
January 31, 2017 and receive  
the first 3 months FREE!
