

CALL MANAGER CAN HELP!

Caller ID spoofing occurs when a caller deliberately falsifies the information transmitted to your caller ID display to make it seem as though someone else is calling. Spoofing is often used as part of an attempt to trick someone into giving away valuable personal information so it can be used in a fraudulent way.

Don't Get Spoofed!

Call Manager from Polar selectively intercepts telemarketers, unknown callers, and callers who have their number blocked. Call Manager is only \$1.95/month.
