

Polar Communications

Job Description

Job Title: Information Technology Specialist
Department: Operations Department
Reports To: IT Supervisor
FLSA Status: Exempt
Prepared By: Human Resources
Approved By: Chief Operations Officer
Approved Date: 01/01/2019

SUMMARY

The IT Specialist assists in maintaining the current computer network for Polar's information services needs. Key responsibilities include installation, maintenance, documentation, testing, modification, and updates the computer network and related equipment to Polar. This position will also assist business customers in the maintenance and administration of their network, security, hardware and software needs at the direction of the IT Supervisor.

The employee performing in this position will be directly responsible to the IT Supervisor or in his/her absence, to the Chief Operations Officer (COO). The employee shall cooperate and work with all other departments for the maximum benefit of the company as directed by the COO.

The employee shall work a regular 40 hour week. This position does not qualify for overtime. The salary is to be determined by the General Manager/CEO in accordance with company policy.

The employee shall adhere to approved published company policies and safety standards at all times.

This employee must possess a positive attitude and have the ability to work and get along with other employees. As the opportunity arises, be able to meet with and deliver exceptional customer service to Polar's customers.

ESSENTIAL DUTIES AND RESPONSIBILITIES

- Maintains hardware and software upgrades on entire company LAN system.
- Assists Board of Directors, all employees and departments with the set-up, and maintenance of individual company computers, including laptops and home computers used for business purposes.
- May assist in the sales process, research, analysis, development of proposals for business customer's telecommunications needs. Makes recommendations and provides consultation in a professional and courteous manner.
- Provides consultation of network security items to include managed firewall, antivirus and endpoint security for business customers. Follows up with customers on an as-needed basis to ensure network security. Upsells customers to insure network security needs are met.
- Communicates with business customers on needs to set up software and/or hardware devices on their network in an accurate and efficient

manner. May provide customer training to ensure clear understanding of the equipment.

- Maintains accurate and current documentation of entire software and hardware LAN system; insuring that all products on the system are properly installed and meet licensing requirements.
- Obtains and monitors maintenance contracts in order to keep current and stay in compliance with requirements.
- Maintains an up-to-date system documentation (including all passwords and access rights); insuring access for IT Supervisor.
- Documents and maintains adequate system security measures; including anti-virus software and provides authorized personnel remote access (Virtual Private Network).
- When requested, coordinates and assists other departments with system upgrades and documentation.
- Possesses exceptional skills in this position; and reports and documentation must be up to date at all times.
- Assists IT Supervisor with budget development and purchases.
- Reports any breach of security or unauthorized access to company files immediately in writing to IT Supervisor.
- Maintains strict confidentiality of computer records, access to system and passwords.
- Develops a system by which unauthorized access to the company computer system and system parameters are monitored daily; preferably this system should be alarmed. In addition, access to this system should be available to the IT Supervisor at all times.
- Keeps the computer area and equipment clean and performs other operator maintenance functions regularly.
- Researches new technology in hardware and software products to meet task requirements in all departments and makes recommendations in selection of new hardware and software when appropriate.
- *Completes other duties as assigned by IT Supervisor.

*These tasks do not meet the Americans With Disabilities Act definition of essential job functions and are usually less than 5% of time spent. However, these tasks still constitute important performance aspects of the job.
