

DATA BACKUP

YOUR BUSINESS IS COMPLETELY DEPENDENT ON YOUR DATA: the Technology Age practically guarantees that downtime due to data loss can doom your company. Not only does downtime cost money, but it also lowers productivity and weakens your customers’ confidence in your products and services.

Backup-as-a-Service (BaaS) is a strategy for data backup where you “lease” your backup solution to be managed by Polar Extreme IT. Instead of having to buy an on-premises system, that may include a server and either a remote disk system or tape unit for backup storage, pay a monthly fee and let Polar Extreme IT provide that solution.

Easily scale up (or down) anytime so you’re never paying for unused hardware or bandwidth. You’ll never worry that you’re running out of capacity and may need to hastily make an expensive purchase. You pay only for what you need and use.

Extend your data protection with Disaster-Recovery-as-a-Service (DRaaS) for bare-bones system recoveries and file restoration. You’ll also gain access to experts who can help your team anytime. If you try to cobble together your DR infrastructure in-house, your own IT team will need to become those experts.

Unfortunately, there are many bad actors in the world that are attempting to either hijack or ransom your data for monetary enrichment. Very often a secure backup is your last line of defense.

PACKAGE OPTIONS

Starting at 50 Gig\$1.50/mo.

- Licenses
- Workstation \$5.95/mo.
- VM server \$9.95/mo.
- Server \$13.95/mo.
